721, 721F, 722,
722F, 723F

Many public transport options are available to Tonsley, as show in the diagram below.

An Integrated Transport Strategy

is being developed to help reduce the environmental impact of transport at Tonsley and to ensure that the district connects into the surrounding transport system, which includes regular trains and buses along key transport corridors.

CARS & CAR PARKING

Whilst sustainable transport options such as walking, cycling and use of public transport will be promoted, it is recognised that cars will still be an important way of accessing Tonsley. Another important focus of the Strategy therefore is the optimisation of car parking spaces and sharing of spaces between different precinct users who may access the car parking at different times of the day. Small and efficient cars are encouraged.
